

OCTAVIO MARRA

SENIOR SOFTWARE ENGINEER

Highlights · Led teams up to 5 engineers · Shipped 4 production insurance platforms with payments + SEO · Delivered AI features (OpenAI) into live products

Experience

Código Del Sur

Fullstack Senior JavaScript Developer · 2024-06 – Present

Building ID verification products with React, Next.js and Python, integrating face recognition and document processing for multiple clients. Acting as internal consultant on related verification initiatives. On the side, running my own venture: fast, fixed-scope web solutions (contact, marketplace, payments, bookings) for small businesses.

Fullstack Senior JavaScript Developer · 2022-12 – 2024-06

- Built scalable white-label Insurance Tech for payments, policies and document management (Node.js, AWS, Firebase).
- Integrated OpenAI for automated recipe generation using Python (data prep + AI pipeline).
- Integrated OpenAI for candidate screening in a fullstack web app using Angular + Node.js.

Switch Software Solutions

Progressed from Full Stack Developer → Development Leader → Frontend Technical Leader across 4+ years.

Frontend Technical Leader · 2022-05 – 2022-09

Main frontend reference on a large insurance project, leading a 5-person team. Drove architecture decisions, reusable components, POCs and technical interviews. Delivered 4 insurance web apps with payment integrations, performance and SEO improvements.

Development Leader · 2019-08 – 2021-10

Led development teams and shipped two flagship platforms:

- TataProvisions: provider management for a national supermarket; APIs and message queues.
- CEPI CAU: management system for 50+ educational centers, with security compliance and efficient data processing across multidisciplinary teams.

Full Stack Web Developer · 2018-05 – 2019-08

Built web apps using Angular and Node.js under SCRUM.

Senior fullstack engineer with ~7 years of experience across JavaScript / TypeScript ecosystems (React, Next.js, Node.js), recently focused on backend and system integrations. Former Technical Lead of a 5-person team for nearly 2 years. Currently working as Senior Fullstack Developer and internal consultant across multiple product lines.
